Carpet Sim

3D Mix & Match Simulation by CarpetsInter®

Carpets Inter®

3D Virtual Simulator by Carpets Inter

Create your own flooring design

Flooring plays a significant role in the design of a room. Selecting the right carpet is the key to success.

At Carpets Inter, we continually search for ways to increase the efficiency of the carpet tile design process. For that reason we developed the Carpets Inter 3D Virtual Simulator.

With the 3D Virtual Simulator you can visually experience our comprehensive carpet tile catalogue. Automatically updated by our inhouse design team, this app ensures that you are up-to-date on our latest offerings.

Create your own floor design with Mix and Match concept.

The tool will enable you to select the desired room scene, design, and color. By changing the carpet installation within the room, you can see how your selected design looks in the room. The tool will also allow you to customize their tile shape and dimension even showing design coordination capabilities of tile on the floor.

Should you need further information or inspiration your Carpets Inter sales representative will be pleased to show you our full range of products and services.

Only for Windows PC
