

Statement of Environment and Energy

A part of our Commitment & Policy Statement on Business Operations. We commit to effective and efficient use of all resources and energy, protection of the Environment, and pollution prevention. Our company will improve energy and water use efficiency by reviewing energy and water consumption at regular intervals and implementing continuous improvements using the best practical environmental options.

Long-Term Corporate Goals

- Monitor and where possible reduce water consumption.
- Increasing of recycled water into process.
- Maintaining zero discharge.
- Improving energy efficiency.
- Reducing emissions of CO₂.
- Minimizing industrial waste.
- Investing in clean, energy-efficient technologies where financially viable.

Objective and Target 2023 - 2025

The Energy and Environmental objectives and targets plan will be reviewed at regular intervals and updated each year. To measure against the past performance baseline

Item / Description	Strategies & Actions	Measurement	Calculation	Time Scale	Accountabilities
Resource & Energy Conservation:					
Energy	Improve 1% from base 2022	Quantity of energy consumption	Energy Index (MJ/sq.m.)	2023 - 2025	Energy conservation team
Water	Improve 3% from base 2022	Quantity of water use	Water Index (Liters/sq.m.)	2023 - 2025	Water conservation team
Environmental Impacts:					
Water Effluents	Zero Discharge	Quantity of water discharge	Water effluent (Liters/day)	2015 onward	Utility Services & OHS Department
Air Emissions	Reduce 1% from base 2022	Quantity of energy consumption	Air Emission Index (g./sq.m.)	2023 - 2025	Utility Services & OHS Department
Waste	Zero landfills	Quantity of landfills disposal	Landfill Index (Kgs/sq.m.)	2009 onward	General Admin. & OHS Department
	Reduce 3% from base 2022	Quantity of material waste	Waste Index (% reduction)	2023 - 2025	Waste minimization team
